

## Detoxify your Home and Go GREEN!

Learn more Wednesday, January 21, 6:30 pm

Meet **Tina Mundschau**, a young mom of two and your facilitator.

Says Tina,

I want to help you detoxify your home and **Go GREEN!**

We don't even realize what we are subjecting ourselves, our kids, pets, and loved ones to when we clean. I urge you to get informed about the **dangers of traditional cleaners** and the **benefits of using Shaklee's non-toxic products!**

According to 3rd party performance testing, **Shaklee's green products equal or outperform 15 national brands, and SAVE you MONEY!**

**Shaklee** was featured on the **Oprah Winfrey Show 5 times in the last year!**

**Shaklee's Get Clean home care line was one of Oprah's "Favorite Things"**, and is my favorite thing, too! Come learn why!

**According to the Poison Control Center, the EPA, the CDC, and the National Institute of Health:**

- Over 90% of poison exposures happen at **HOME**.
- Common **chlorine bleach** is the #1 household chemical involved in **poisoning**.
- Indoor air quality is up to 5 times worse than outdoors.
- We spend up to 90% of our time indoors (especially in WI!)
- Common cleaners give off fumes that can increase the risk of kids developing asthma, the most common chronic childhood disease.
- 1 in 13 school-aged children has asthma. Rates in children under five have increased more than 160% from 1980-1994.

-If your home is anything like the average U.S. home, you generate more than **20 pounds of household hazardous waste each year** (the EPA designates **toilet cleaners, tub and tile cleaners, oven cleaners, and bleach as hazardous waste**).

Be an informed consumer, come get the facts!

Bring a loved one, this information is too important not to share!!!

Suggested exchange: \$12 materials and refreshments

Location:

**Kindred Spirit Wellness Center**  
2312 N Grandview Blvd, Suite 101  
Waukesha WI **RSVP** at 262 271 8462
